

A SNAPSHOT OF

WOODSIDE'S CONTRIBUTION TO THE AUSTRALIAN COMMUNITY

As Australia's leading LNG producer, we are proud of our contribution to the communities in which we operate.

ENERGY SECURITY

In 2017, Woodside supplied **36,530 TJ** of natural gas into the Western Australian domestic market or about **9.5%** of total supply. This percentage increases to **36%** when calculating the supply from our operated facilities.

We also contributed **\$3.5 MILLION** towards science and technology initiatives that are supporting our next wave of developments.

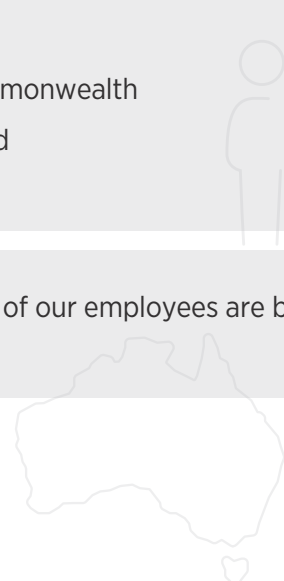

ECONOMIC

In 2017, Woodside paid **\$797 MILLION** in taxes and royalties to the Commonwealth and State Governments in Australia, up from \$525 million in 2016. This included **\$154 MILLION** to Western Australia's state revenue.

As an operator, we spent **\$3.1 BILLION** on local content and services, supporting **Australian jobs and businesses**. Over **84%** of this was spent in Western Australia.

More than **98%** of our employees are based here in Australia.

All figures in AUD and current as of 31 December 2017 (Australian operations version).

SOCIAL

In 2017, we contributed more than **\$16.1 MILLION** in social investment to Australian communities, which went towards a range of programs including: education, environmental outreach, early childhood education, employment and volunteering initiatives.

Since 2016, contracts awarded to Indigenous businesses by Woodside and its suppliers has increased by **34%**

ENVIRONMENT

In 2017, Woodside released its Climate Change Policy supporting its defined climate change approach in three ways:

1 Ensuring the **RESILIENCE** of our portfolio.

2 Improving the carbon **PERFORMANCE** of our facilities and developments.

3 Communicating the **FUTURE ROLE** of gas.

Woodside continues to invest in and promote **technologies that reduce emissions and promote energy efficiency.**

We contributed **\$4.1MILLION** towards environmental programs and studies to understand the environments in which we operate, evaluate potential impacts and be informed to make the right decisions on environmental management.

Woodside believes that gas will continue to play a large role in the future of energy, as a reliable source and through integration with batteries and renewables.

Gas helps reduce emissions. It displaces coal and complements renewables in power generation because of its affordability, lower carbon footprint and flexibility as back-up generation.

All figures in AUD and current as of 31 December 2017 (Australian operations version).
